About Me

Software Engineer with 1+ year of experience building scalable web applications using Angular, React, Node.js, and Python. Currently pursuing an M.S. in Artificial Intelligence at NTU Singapore.

Experience

ASSOCIATE ENGINEER | 1 YEAR 3 MONTHS | BRILLIO TECHNOLOGIES

Contributed to the development of a unified enterprise platform that streamlined internal workflows, including timesheets, leave management, reimbursements, and HR services. Built responsive UI components using React and micro-frontend architecture (Module Federation), collaborating closely with design and product teams. Worked across the full development lifecycle utilizing React, Angular, Node.js, Python, and AI technologies to deliver scalable business solutions

RESEARCH INTERN | 5 MONTHS | ARTPARK, IISC

Developed low-latency video streaming and teleoperation systems using WebRTC, Python, OpenCV, FFmpeg, and GStreamer. Built video transmission pipelines for streaming IP camera feeds in real time across distributed systems. Configured and integrated MediaMTX and RTSP-based video brokers to enable efficient video delivery between endpoints.

WEB DEVELOPER INTERN | 4 MONTHS | BRILLIO TECHNOLOGIES

Developed and maintained features for enterprise applications, including the Project Governance Portal, Help Desk, and Digital Office Portal, using the MEAN stack. Built RESTful APIs using Node.js, Express.js, and MongoDB to support business workflows and data management. Developed responsive frontend components and modules in Angular, leveraging NgRx for state management and API integration.

Education

MSAI | 2025 - 2026 | NANYANG TECHNOLOGICAL UNIVERSITY, SINGAPORE

I am currently pursuing my master's degree in the field of Artificial Intelligence in Nanyang Technological University, Singapore. I have obtained a grade point average of 3.19.

BE CSE | 2019 - 2023 | NEW HORIZON COLLEGE OF ENGINEERING, BANGALORE

I completed my bachelor's degree in the field of Computer Science and Engineering in New Horizon College of Engineering, Bangalore which is affiliated to Visvesvaraya Technological University, Belagavi. I have obtained a grade point average of 8.72.

Technical Skills

I have a technical understanding of React, Angular, HTML, CSS, NgRx, Python, JavaScript, TypeScript, Java, C++, Node.js, Express.js, REST APIs, MongoDB, SQL LangChain, Machine Learning, Deep Learning, Docker, Git, Postman, Bitbucket.

Projects

RESTOCARE

Built a full-stack AI-powered mental wellness platform using React, Node.js, MongoDB, Express, and Python. This was done during the Brillio Sparkathon 2023-24.

BARK

This was done during the NMIT Hackathon 2022. It is a website which is used to bring together a community of dog lovers. Other features include blogging and messaging.

Publications

A REAL TIME TRAFFIC SIGN DETECTION MODEL USING CNN | IEEE XPLORE

The deep learning model used is an LeNet-CNN hybrid model attaining a validation accuracy of 98.60% and a testing accuracy of 94.26%. The Overall time taken by this model is 1500 milliseconds. The project paper has been published in IEEE Xplore and is Scopus Indexed.

Achievements

BEST PAPER AT ICCPCT IEEE CONFERENCE, 2023

My project paper titled "A Real Time Traffic Sign Classification Model Based on Convolutional Neural Networks" won best paper at the International Conference on Circuits, Power and Computing Technologies, 2023 which was hosted by Baseline Mathews II College of Engineering, Kollam in association with IEEE, India Council.
