Experience

WEB DEVELOPER INTERN | 4 MONTHS | BRILLIO TECHNOLOGIES

I worked as a MEAN stack developer with team CodeX for creating Project Governance page, Help Desk page and Digital Office Portal. Technologies used includes Node js, Bitbucket, Angular and Postman. Node js was used for creating get, post, update and delete APIs as well as other backend requirements. Express for building restful APIs. Mongo DB was used as database. Bitbucket was used for version control, creating branch and pushing changes. Angular was used for front end development. This includes creating components, modules, using NgRX for API integration and animations and Postman for API testing. The internship was carried out from February 2023 to May 2023.

RESEARCH INTERN | 5 MONTHS | ARTPARK, IISC

I was a Research Intern at ARTPARK from August 2023 to December 2023. The Internship was carried out at the department of Electrical Communication Engineering, Indian Institute of Science, Bangalore. During my time at ARTPARK I worked on various software and technologies such as setting up a video broker, low-latency video streaming software and creating a teleoperator system using WebRTC. Technologies used include FFMPEG, Gstreamer, OpenCV and Python for streaming video from an IP camera. I also worked with MediaMTX server to send the video frames from one system to another using RTSP.

Education

BE CSE | 2019 - 2023 | NEW HORIZON COLLEGE OF ENGINEERING, BANGALORE

I completed my bachelor's degree in the field of Computer Science and Engineering in New Horizon College of Engineering, Bangalore which is affiliated to Visvesvaraya Technological University, Belagavi. I have obtained a grade point average of 8.72.

Technical Skills

I have a technical understanding of C, C++, Java, Python, HTML, CSS, JavaScript, RDBMS, SQL, UNIX command line, UNIX Shell scripting, C# .net framework, NOSQL, Node JS, Express JS, Angular, MongoDB, Mongoose, FFMPEG, GStreamer, OpenCV, Docker, GitHub, NgRX, Bitbucket, Postman, Wireshark, JUnit, Selenium, MEAN stack, RESTful APIs, Data Science, Machine Learning, AI, Deep Learning and Computer Networks.

Certifications

PROGRAMMING FOR EVERYBODY (GETTING STARTED WITH PYTHON)

I have completed this course conducted by University of Michigan on Coursera. Certificate link:
<https://coursera.org/share/3eb5d1adf9bd4ffc5be298e43833516d>

WHAT IS DATA SCIENCE

I have completed this course conducted by IBM on Coursera. Digital badge:
<https://www.youracclaim.com/org/ibm/badge/data-science-orientation>

Projects

RESTOCARE

An app that uses a chatbot powered by GPT-3.5 to help those with mental health issues by analyzing the extent of illness to providing effective solutions and a dashboard. This was implemented using Node, React js, Mongo DB, Express and Python. This was done during the Brillio Hackathon 2023-24.

BARK

This was done during the NMIT Hackathon 2022. It is a website which is used to bring together a community of dog lovers. Other features include blogging and messaging. This was implemented using WIX platform.

Publications

A REAL TIME TRAFFIC SIGN DETECTION MODEL USING CNN | IEEE XPLORE

This was my final project for my Bachelor's degree. It was coded in Python using Google Collab. This is used to detect traffic signs and alert the user about it. The deep learning model used is an LeNet-CNN hybrid model attaining a validation accuracy of 98.60% and a testing accuracy of 94.26%. The Overall time taken by this model is 1500 milliseconds. The project paper has been published in IEEE Xplore and is Scopus Indexed.

Achievements

BEST PAPER AT ICCPCT IEEE CONFERENCE, 2023

My project paper titled "A Real Time Traffic Sign Classification Model Based on Convolutional Neural Networks" won best paper at the International Conference on Circuits, Power and Computing Technologies, 2023 which was hosted by Baselios Mathews II College of Engineering, Kollam in association with IEEE, India Council.
